Title	Page
An experimental investigation of decompressive craniectomy in a rat model of hemispheric stroke treated with decompressive craniectomy	101
An obstructive retrosternal thyroid mass mimicking asthma	149
Anemia in chronic kidney disease	24
Approach to mediastinal masses: a comparison of open surgery and uniportal video-assisted thoracoscopic surgery techniques	13
Approach to restless leg syndrome in hemodialysis patients	69
Augmented and virtual reality in medicine	124
Clinical presentation, diagnosis, complications and treatment of obstructive sleep apnea syndrome	140
Comparison of novel oxidative stress and systemic inflammation marker levels in patients with bipolar disorder and schizophrenia	54
Determination of bariatric surgery outcomes: prospective study	28
Does the nutritional literacy of adolescents affect their eating behavior?	107
Effect of adipose tissue-derived stromal vascular fraction on the viability of random-pattern skin flaps: an experimental study	19
Efficacy of ferric carboxymaltose therapy in celiac patients	66
Evaluation of iron deficiency anemia during acute infection in children	126
Evaluation of non-preoperative chest diseases consultations	58
Evaluation of serum natural antioxidant levels in patients with schizophrenia, schizoaffective disorder, and bipolar disorder	41
Evaluation of sleep quality in children with allergic rhinitis	84
Evaluation of the relationship between gastroesophageal reflux disease and glycogenic acanthosis	136
Exploring the competence of artificial intelligence programs in the field of oculofacial plastic and orbital surgery	63
Healthcare-associated infections: prospective rotational surveillance data of a training and research hospital	6
Inguinal hernia coexisting with spermatic cord leiomyoma	77
Investigation of the D188V mutation in the SCN1A gene in patients with idiopathic generalized epilepsy	79
Is the peripapillary area completely healthy in Stargardt disease?	130
Is there a relationship between chronic low back pain and spinal sagittal balance? A prospective controlled study	56
Laboratory changes and parenchymal changes in computed tomography after COVID-19 pneumonia	33
Oral health and periodontitis: why should we care?	88
Rehabilitation of total hip arthroplasty	96
The dental perspective on metformin	92

The effect of sodium-glucose linked transporter 2 inhibitor and glucagon-like peptide-1 receptor agonist on weight and blood pressure control in an obese diabetic patient: a case report	146
The frequency of sleep disorders and their relationship with demographic factors in patients with tinnitus	116
The impact of surgical resection on prognosis in gastric neuroendocrine tumors	49
The relationship between anterior fontanelle and head circumference in term newborns	46
The relationship between sodium glucose co-transporter 2 inhibitors and diabetic ketosis/infection: single center retrospective experiences	1
Things to know about tetanus	120
Treatment of recurrent pulmonary thromboembolism with ecosonic endovascular system	73
